DEPARTMENT OF **RESOURCES**

## ***ABOUT TECHNICAL PUBLICATIONS***

Primary Industries in the Department of Resources produce a variety of publications including Agnotes, Technotes, Technical Bulletins and Incidental Publications.

Agnotes are one to six pages, simply written and authoritative. They are illustrated and directed at a general audience. They are free.

Technotes are of a similar length, though more technical and directed at a more specialised audience. They are free.

Technical Bulletins range from 20 to over 100 pages. They cover a wide variety of subjects, and range in style from very technical to quite simple. Their price is \$9.50 a copy unless marked otherwise.

Incidental Publications include pamphlets, books and booklets. Their prices are shown in this catalogue.

**Publications produced or updated since the last edition of the catalogue are listed separately under “Most Recent Publications”.**

All the above publications can be obtained from the Technical Publications Section, John England Building, Berrimah Farm. Please refer to the map on the back cover.

To obtain any publications from this catalogue by mail, please complete and send the order form on the back pages.

Agnotes, Technotes and Technical Bulletins are available online at [www.nt.gov.au/d/publications](http://www.nt.gov.au/d/publications) or order via email [technical.publications@nt.gov.au](mailto:technical.publications@nt.gov.au)
