

## **Can I request an extension of time to submit a report, data or expenditure under the NT Mining Act?**

Requests for extensions of time to submit reports should be made through [tmt.drdpifr@nt.gov.au](mailto:tmt.drdpifr@nt.gov.au). Only one extension period will be granted for each report. Extensions on annual reports are not normally to exceed another allocation of the normal reporting period. Where there are delays in obtaining analytical data or in processing geophysics, an extension of up to three months may be considered.

Extensions may not be granted to companies or individuals who make multiple or repeated requests. It is imperative that the Department releases information on ground being turned over as quickly as possible, so requests for extensions on final surrender reports and partial relinquishments will be treated less leniently and on a case-by-case basis.

Requests for extensions of time to submit an expenditure form will only be approved under extenuating circumstances and for no longer than a month.
