

AGES Program Highlights

The AGES technical program is scheduled to run from:

- ▶ 8:30am–4:30pm Tuesday 27 March 2012
- ▶ 9:00am–2:30pm Wednesday 28 March 2012

Program highlights will include:

- Overview of recent exploration highlights in the NT (**NTGS**)
- Latest information on new copper-gold discoveries using HeliTEM in the Tennant Creek area (**Emmerson Resources**)
- Release of uranium mineral system study at Bigrlyi and regional implications for the Ngalia Basin (**NTGS and CSIRO**)
- Update on new rare earths discoveries in the Top End (**TUC Resources Ltd**)
- Results and implication of Territory-wide geochemical sampling under the National Geochemical Survey of Australia (**NTGS**)
- The latest in geological concepts and exploration results from uranium exploration in western Arnhem Land (**Alligator Energy and Cameco Australia**)
- Release of a Territory-wide ASTER remote sensing dataset (**CSIRO**)
- The latest on the rapidly emerging Jervois copper project in central Australia (**Kentor Gold**)
- Release of information on uranium mineral system studies at Ranger (**CSIRO**)
- More success in iron ore exploration in the Roper iron field (**Western Desert Resources**)
- The latest in new geological and exploration concepts from regional geoscience programs in the Arunta Region (**NTGS**)
- Update on the Molyhil tungsten-molybdenum project (**Thor Mining**)
- A prospectivity assessment of central Australia (**Geoscience Australia**)
- Latest results from emerging gold discoveries in the Tanami (**ABM Resources**)
- Information on amendments to the *Mining Management Act* and *Petroleum Act* (**NT Government**)
- Information on new NTGS products, and current and upcoming programs under the *Bringing Forward Discovery* initiative (**NTGS**)

AGES Dinner Speaker:

Allan Trench (Professor, Centre of Exploration Targeting, University of Western Australia) –
“Creating Value & Managing Risk in Mineral Exploration: From IPOs to Intersections to Infinity and Beyond.”

A complete program will be available on the website by Friday 24 February 2012.
