

Property Identification Code (PIC)

It is a mandatory requirement for owners of an identifiable property to have a PIC registered for that property. An identifiable property is a property that keeps any of the following livestock: Alpacas, buffalo, camels, cattle, deer, goats, horses, llamas, pigs, poultry, sheep.

Owners are issued with a certificate listing the PIC, the property portion number and owner details.

The PIC is used for all waybills and most documents relating to cattle and buffalo. The property name and PIC are provided to the NLIS national database. There are currently 880 operational PIC's in the Northern Territory.

A Property Identification Code (PIC) search facility is available on the DRDPiFR Internet to assist industry personnel.

It is located on the DRDPiFR Internet site located with other important issues relating to **Livestock Identification and Movement** at www.nt.gov.au/drdpifr/nlis or through the direct URL: <http://pic.primaryindustry.nt.gov.au>

We envisage the users of this database will include:

- Producers
- Agents;
- Livestock exporters;
- Saleyards;
- Tag Manufacturers;
- Processors;
- State Departments.

How to use the Search Engine

Searching on PIC

PICs are of the format 'THDG9999'. All PICs must start with the letter T, for Territory. Type in the PIC and click on 'Search'. The property name and region will be displayed.

Searching on Property Name

Type in the name of the property (or any part thereof e.g. Sun for Sunnyside) and click on 'Search'. The results will be sorted by the property name.

Note

Searches are not case-sensitive. Searches return matches on any part of the field. To clear the search fields, click on 'Reset'.

Wildcards

Wildcards can be used for advanced searching. The allowable wildcards are shown below:

%: matches zero or more characters and _ : matches any single character. Eg %abc will list all data with "abc" within any part of the text.
