

## NOTIFIABLE DISEASES OF ANIMALS

### REPORTING FORM (effective from 14 December 2005)

Immediate reporting of prescribed diseases under the *Stock Diseases Act* is required by the owner, manager, agent or veterinarian if the disease is suspected, or there are positive laboratory results.

There is a penalty of 500 penalty units (currently \$55,000) for failing to report. While the major emphasis is reporting emergency and exotic diseases, endemic disease reporting is also important. A lesser penalty would be imposed by a Court for endemic diseases.

#### IMPORTANT

**Contact the Chief Veterinary Officer or your local Regional Veterinary Officer if you suspect or confirm an emergency or exotic animal disease listed overleaf.**

For an endemic disease please tick a box below and fax to the Chief Veterinary Officer (08) 8999 2089.
