

NOTIFIABLE DISEASES OF LIVESTOCK

REPORTING FORM (effective from 1 September 2009)

Immediate reporting of prescribed diseases of livestock including horses under the *Livestock Act* is required by the owner, manager, agent or veterinarian if the disease is confirmed or reasonably suspected, or there are positive laboratory results.

There is a penalty of 500 penalty units (currently \$65,000) for failing to report. While the major emphasis is reporting emergency and exotic diseases, endemic disease reporting is also important. More information is available from your local Senior Field Veterinary Officer.

IMPORTANT

Contact your local Senior Field Veterinary Officer or the Chief Veterinary Officer if you suspect or confirm an emergency or exotic animal disease listed overleaf.

For all notifiable diseases please tick a box below and fax to the Chief Veterinary Officer (08) 8999 2089 to report in writing.
