

**PURPOSE** To ensure that Northern Territory Government’s built assets are fit for purpose, consider life cycle costs, represent value for money and support the achievement of the Territory 2030 targets; achieved through the provision of strategic advice on a whole-of-government basis for infrastructure planning, capital works program definition and project management services for the design, procurement and oversight of the Territory Government’s infrastructure program.

**VISION** To be recognised as the experts in government, achieving best practice infrastructure programming, procurement and construction, whilst maximising the use of Territory business and resources.

**MISSION** Quality government infrastructure delivered on time and within budget.

### Implement the Asset Management System

- Provide and maintain the contemporary asset management system for government;
- Use AMS as a management support tool for DCI’s core business ;
- Prioritise our workforce development to optimise benefits achieved from the implementation of AMS;
- Maximise the information management and corporate business reporting improvements offered by AMS.

### Develop enhanced business management practices

- Achieve ISO9001 Quality Management certification;
- Ensure business practices are delivering value for money outcomes;
- Increase business focus within individual projects;
- Ensure the optimal use of available technologies to support business management, including electronic document and records management;
- Tailored training and development for all staff to maximise the potential of our people;
- Enhance the capacity to deliver improved business outcomes through the increased delegation of responsibility and accountability to the regions.

### Professional project and program management

- Ensure project planning delivers high quality preliminary briefs;
- Validate project briefs prior to project commencement;
- Ensure DCI procurement practices deliver the best combination of price and non-price outcomes;
- Accurate, meaningful reporting on project delivery performance against time and budget targets;
- Establish alignment with AIPM though targeted and strategic professional development.

### Enhance client and stakeholder relationships

- Develop initiatives for sustainable industry growth through strong and regular engagement and through industry forums;
- Enhance client services and client reporting to better deliver effective, efficient and innovative solutions;
- Deliver as committed under partnering agreements with all clients.
