

Leanyer Recreation Park Upgrades Commenced

Scope of works

Construction of a Café Bistro at the Leanyer Recreation Park has commenced.

The new development will deliver an indoor and al fresco dining with seating for 70 people and catering for up to 300 visitors to the park.

The existing kiosk will be stripped out and then an external air conditioned eating area will be created for a fully commercial kitchen.

The project is valued at \$850,000 and the upgrades are expected to be completed early 2012.

Adding to your lifestyle

Following the completion of three water slides in 2009, the Leanyer Recreation Park has attracted approximately 100,000 visitors a year.

The new bistro area will enhance the Leanyer Recreational Park and encourage more visitors to frequent the facility.

During construction

A temporary kiosk will be operational throughout the construction period.

The construction area will be completely fenced off and signs erected to prevent unauthorised persons from entering the site.

During construction visitors are asked to heed all signs and restrictions.
