

Tommy's Creek Five Mile Creek project update

Tommy's Creek

Works have commenced on the new bridge at Tommy's Creek on Daly River Road.

The bridge will replace the existing culverts and provide additional flow area for the creek.

A temporary detour has been constructed and will remain open until the creek is flowing.

The traffic will then be diverted back onto the crossing to ensure evacuation routes remain open.

Five Mile

Works have commenced to lift the road level at Five Mile Creek crossing. During the works, the road will not be closed and motorists are advised to heed all traffic devices and speed limits in place around the works.
