

Vanderlin Drive Duplication

Scope of work

Duplication work will soon start on Vanderlin Drive between Patterson Street and Mueller Road, Malak.

Works will include:

- construction of two additional lanes
- relocation of bus stops
- changes to the pedestrian crossing
- installation of traffic lights
- construction of a median strip

Recent changes after public consultation also include an entry and exit point to and from Vanderlin Drive Service Road to Vanderlin Drive, and two 'u-turn permitted' areas.

The duplication will be similar to the existing dual lanes on Vanderlin Drive and will improve the safety of motorists and pedestrians. The project also includes landscaping.

Works are scheduled for completion by mid 2012, weather permitting.

Traffic signals

Traffic signals and a pedestrian crossing will be installed at the intersection of Vanderlin Drive and the main entrance to the Leanyer Recreation Park to improve pedestrian safety.

New entry/exit points

New entry and exit points will be included between Vanderlin Drive and Vanderlin Drive Service Road (between Patterson Street and Mueller Road).

U-turns

After construction, u-turns will be permitted on Vanderlin Drive (adjacent to the entry/exit points to Vanderlin Drive Service Road).

Pedestrian crossing

The existing pedestrian crossing on Vanderlin Drive will remain but the traffic lights will be removed.

Bus stops

During construction, there will be two temporary bus stops located on Vanderlin Drive near Patterson Street and Calytrix Road.

Impacts during construction

There will be lane closures and speed restrictions in place on Vanderlin Drive.

Please heed all traffic devices and speed limits.
