

Weed Management Officers

The Challenge

To manage and control the variety of weeds from the Top End through to Central Australia, across the diverse landscapes of the Territory. The Weed Branch helps to prevent weeds spreading into or from the NT, as well as controlling those weeds that are already here.

The job

- The job involves a variety of activities including field work, working with people developing weed management plans for properties, catchments and regions and office work developing maps, extension and education programs
- The job also involves working with a range of organisations including property owners, local councils and Aboriginal communities, States and Territories and Commonwealth bodies

What we offer

- Opportunity to work outdoors with equipment such as GPS's, quad bikes, boats and 4 wheel drive vehicles
- On the job training
- Career development and training
- Regular annual salary plus allowances
- Six weeks annual leave

What you will need

- Strong commitment to natural resource management
- An NT class "C" drivers licence
- Certificate, diploma or degree in Agriculture, Natural Resource Management or equivalent experience
- Ability to work in remote locations
