

Volume 1 – Main Report

1	Introduction -----	1-1
1.0	Introduction	1-1
1.1	Overview	1-1
1.2	History of Open Cut Project	1-1
1.3	Test Pit Project	1-2
1.4	Modified Open Cut Project	1-3
1.5	PER Objectives	1-3
1.6	Project Proponent	1-4
1.7	Environmental Assessment Process	1-5
	1.7.1 Commonwealth Government	1-6
2	Modified Project -----	2-1
2.0	Modified Project	2-1
2.1	Open Cut Project	2-1
2.2	Project Modifications	2-1
2.3	Design Criteria	2-7
2.4	Construction Schedule	2-7
2.5	NAF Rock Availability	2-8
3	Alternatives -----	3-1
3.0	Alternatives	3-1
3.1	Summary	3-1
3.2	Continuation of Underground Mining	3-2
3.3	Open Pit Mining	3-3
	3.3.1 Benefits of Open Pit Mining	3-3
	3.3.2 Mining Without Affecting the McArthur River	3-4
3.4	Overburden Disposal	3-4
	3.4.1 Out-of-Pit Disposal	3-4
	3.4.2 In-Pit Disposal	3-4
3.5	Alignment of Flood Protection Bund	3-5
3.6	Alignment of McArthur River Diversion Channel	3-5
3.7	Design of Barney Creek Diversion Channel	3-5
3.8	No Project Alternative	3-6
4	McArthur River Diversion -----	4-1
4.0	McArthur River Diversion	4-1
4.1	Purpose	4-1
4.2	Summary	4-1
4.3	McArthur River Geomorphology	4-5
	4.3.1 Introduction	4-5
	4.3.2 McArthur River Catchment	4-5
	4.3.3 Geomorphic Environments of McArthur River	4-7
	4.3.4 Conclusions	4-19
4.4	Aquatic Habitats of the Existing McArthur River Channel	4-19
	4.4.1 Summary	4-19
	4.4.2 Survey Methods	4-20

4.4.3	General Site Conditions	4-20
4.5	Revised Hydraulic Analyses of the McArthur River	4-27
4.5.1	Introduction	4-27
4.5.2	Re-calibration of the Hydraulic Model for Low Flows	4-27
4.5.3	Re-Calibration of Hydraulic Model to the January 2003 Flood Event	4-28
4.5.4	Adopted Roughness Coefficients	4-29
4.5.5	Confirmation of Roughness Coefficients Using Cowan's Method	4-30
4.5.6	Survey Accuracy and Significance	4-37
4.5.7	Re-modelling of Existing River Conditions	4-38
4.5.8	Design Modification to Diversion Channel	4-39
4.5.9	Re-Modelling the Modified Diversion Channel	4-45
4.5.10	Stream Power and Erosion Potential of Diversion	4-48
4.6	Rehabilitation of the Proposed Diversion Channel	4-52
4.6.1	Introduction	4-52
4.6.2	General Guidelines	4-52
4.6.3	Proposed Rehabilitation Strategy	4-53
4.7	Clearing and Riparian Habitat Fragmentation	4-60
4.7.1	Summary	4-60
4.7.2	Proposed Clearing Schedule	4-61
4.7.3	Potential Fauna Impacts	4-61
4.7.4	Proposed Monitoring Program	4-63
5	Barney Creek Diversion -----	5-1
5.0	Barney Creek Diversion	5-1
5.1	Purpose	5-1
5.2	Summary	5-1
5.3	Barney Creek Geomorphology	5-5
5.1.1	Barney Creek Catchment	5-5
5.1.2	Barney Creek Sub-catchment	5-5
5.1.3	Buffalo Creek Sub-catchment	5-6
5.1.4	Barney Creek Upstream of the Mine	5-6
5.1.5	Surprise Creek Sub-catchment	5-7
5.1.6	Diverted Reaches of Barney/Surprise Creeks	5-9
5.1.7	Conclusions	5-14
5.4	Aquatic Habitats	5-15
5.5	Flood Hydrology for Barney and Surprise Creeks	5-16
5.5.1	Flood Flows	5-16
5.5.2	Extreme Flooding	5-17
5.6	Hydraulic Modelling of Barney and Surprise Creeks	5-18
5.6.1	Introduction	5-18
5.6.2	Estimation of Roughness Coefficients Using Cowan's method	5-18
5.6.3	Modelling of Existing Creek Conditions	5-22
5.6.4	Flood Capacity of Surprise Creek	5-24
5.6.5	Design Requirements from PER and Follow-on Discussions	5-25
5.6.6	Modelling of Original (EIS) Diversion Design	5-26
5.6.7	Design Modifications to Diversion Channel	5-27
5.6.8	Modelling the Modified Diversion Channel	5-30
5.6.9	Annandale Analysis of Stream Power and Erosion Potential of Barney Creek Diversion	5-34
5.7	Rehabilitation of the Proposed Diversion Channel	5-38

6	Waste Management -----	6-1
6.0	Waste Management	6-1
6.1	Summary	6-1
	Measures to Prevent Mobilisation of Contaminants	6-1
6.2	6-1	
	6.2.1 Overburden Emplacement Facility	6-2
	6.2.2 Flood Protection Bund and Tailings Storage Facility	6-2
	Kinetic Leach Test	6-3
	Results	6-3
6.3	6-3	
6.4	Risk Management Strategy	6-9
	6.4.1 Trigger Levels and Corrective Actions	6-9
	6.4.2 Sampling and Analysis Constraints	6-10
	6.4.3 Containment Contingencies and Response Times	6-10
	6.4.4 Start-up Monitoring and Impacts	6-11
7	Tailings Storage Facility-----	7-1
7.0	Tailings Storage Facility	7-1
7.1	Summary	7-1
7.2	Design Strategies to Manage Environmental Impacts	7-3
	7.2.1 Decommissioning Existing Cell	7-3
	7.2.2 New Cell Embankment Design	7-3
	7.2.3 Additional Seepage Controls	7-4
	7.2.4 Tailings and Water Management	7-8
7.3	Operational Strategies To Manage Environmental Impacts	7-9
7.4	Closure Strategies to Manage Environmental Impacts	7-11
7.5	Long-Term Stability	7-12
	7.5.1 Overview	7-12
	7.5.2 Cover Design	7-12
	7.5.3 Long-Term Performance Modelling	7-15
	7.5.4 Vegetation Cover	7-16
	7.5.5 Stormwater Management	7-17
	7.5.6 Long Term Erosion Protection	7-19
7.6	Risks to the Receiving Environment	7-21
7.7	Alternative Seepage Control Measures	7-22
7.8	Modelling of Recovery Bore Performance	7-22
	7.8.1 TSF Operation	7-23
	7.8.2 TSF Closure	7-23
	7.8.3 Drawdown Impacts to Surrounding Groundwater Resources	7-24
7.9	Contaminated Sludge	7-25
8	Water and Sediment Quality -----	8-1
8.0	Surface Water - Water and Sediment Quality	8-1
8.1	Summary	8-1
8.2	Transport of Metals	8-2
	8.2.1 Existing Water Quality	8-2
	8.2.2 Potential Risks of Metals Transport	8-3
	8.2.3 Metals Transport Risk Assessment and Mitigation	8-3
8.3	Fate of Metal Species	8-11
8.4	NAF Runoff Monitoring	8-12

8.5	Sediment Monitoring Program	8-13
8.6	TSF Discharge Regime	8-16
8.7	Marine Monitoring Program	8-18
8.7.1	Bing Bong	8-18
8.7.2	McArthur River Estuary and Sir Edward Pellew Islands	8-21
9	Surface Water - Flood Protection Bund -----	9-1
9.0	Surface Water - Flood Protection Bund	9-1
9.1	Summary	9-1
9.2	Flood Bund Integrity	9-1
9.2.1	Introduction	9-1
9.2.2	Design Basis	9-2
9.2.3	Construction Program	9-4
9.2.4	Design Considerations	9-5
9.3	Overtopping Risk	9-9
10	Groundwater -----	10-1
10.0	Groundwater	10-1
10.1	Summary	10-1
10.2	Potential Drawdown Effects on Djirrinmini Waterhole	10-2
10.3	Potential Impacts from Extension of No-Flow Period in McArthur River	10-3
10.4	Management and Mitigation Strategies - Djirrinmini Waterhole	10-4
10.4.1	Proposed Management Strategy	10-4
10.4.2	Mitigation Strategies	10-4
10.4.3	Sacred Site Significance	10-5
10.5	Proposed Monitoring Program	10-5
10.5.1	Refinement of Groundwater Flow Model for Drawdown Prediction	10-5
10.5.2	Baseline and Annual Riparian Vegetation Surveys	10-6
10.5.3	Water Flow, Level and Quality Monitoring - Djirrinmini Waterhole	10-6
10.5.4	Aquatic Biota	10-6
11	Biology -----	11-1
11.0	Biology	11-1
11.1	Summary	11-1
11.1.1	Freshwater Sawfish	11-1
11.1.2	White-Browed Robin	11-1
11.1.3	Migratory Birds at Bong Bong	11-1
11.1.4	Monitoring Programs	11-2
11.2	Aquatic Ecology	11-2
11.2.1	Aquatic Biodiversity and Ecology	11-2
11.2.2	Freshwater Sawfish	11-4
11.2.3	Management and Mitigation of Fish Passage throughout the Diversion Channel	11-5
11.2.4	Proposed Aquatic Monitoring Program	11-7
11.3	White-Browed Robin	11-9
11.3.1	Conservation Status	11-9
11.3.2	Status at McArthur River	11-10
11.3.3	Impacts and Proposed Monitoring Program	11-10
11.4	Migratory Birds	11-11
11.4.1	Migratory Bird Fauna at Bing Bong and McArthur River Estuary	11-11

11.4.2	Current Monitoring Program at Bing Bong	11-13
11.4.3	Impact Assessment of Migratory Bird Species at Bing Bong	11-13
11.4.4	Proposed Management and Monitoring Program	11-14
12	Heritage -----	12-1
12.0	Heritage	12-1
12.1	Site Preservation	12-1
12.2	Traditional Owner Consultation	12-1
12.3	Flood Impacts	12-2
13	Social Impact -----	13-1
13.1	Summary	13-1
13.1.1	Community Engagement Strategy	13-1
13.1.2	Regional Economic and Social Development	13-2
13.2	Community Engagement Strategy	13-3
13.2.1	Policy Position	13-3
13.2.2	Status of Current Engagement	13-5
13.2.3	Challenges and Opportunities	13-6
13.2.4	Stakeholders	13-7
13.2.5	Community Engagement Strategy	13-8
13.2.6	Community Engagement Methodology	13-9
13.2.7	Information Giving	13-10
13.2.8	Consultation	13-12
13.2.9	Active Participation	13-14
13.2.10	Evaluation Techniques	13-17
13.2.11	Administration	13-17
13.3	Regional Social and Economic Assessment	13-20
13.3.1	Introduction	13-20
13.3.2	Socio-Economic Profile	13-22
13.3.3	MRM Economic Impacts – Northern Territory Suppliers	13-23
13.3.4	MRM Economic Impacts – Employment	13-25
13.3.5	MRM Economic Impacts – Training and Development	13-28
13.3.6	Management of Economic and Social Development	13-32
13.3.7	Economic and Social Benefits	13-42
13.4	Summary of Commitments	13-43
13.4.1	Commitments to Community Engagement	13-43
13.4.2	Commitments to Socio-Economic Development	13-44
14	EPBC Act Matters -----	14-1
14.0	EPBC Act Matters	14-1
15	References -----	15-1
15.0	References	15-1

Volume 2 – Appendices

A	Government Requirements for PER
B	Project Execution Plan
C	Water Quality Report
D	Traditional Owners Inspection of MRM4
E	Aquatic Habitats Characterisation
F	Hydraulic Modelling Results
G	Tailings Storage Facility Stability Assessment
H	Kinetic Leach Test Results
I	Rehabilitation Plan for Proposed Diversion Channels
J	Riparian Bird Monitoring Program
K	Ecology of Some Fish Species of the McArthur River
M	Migratory Bird Species Recorded in the Bing Bong - McArthur River Estuary
N	Tailings Storage Facility Seepage Modelling Report
O	Community Reference Group Terms of Reference and Membership
