

A GUIDE TO THREATENED SPECIES IN THE NORTHERN TERRITORY

NORTHERN TERRITORY PLANNING SCHEME CLEARING OF NATIVE VEGETATION 2004

The Clearing of Native Vegetation Controls require applicants to demonstrate consideration of the presence of **threatened species** as declared under the *Territory Parks and Wildlife Conservation Act* when preparing an application for the clearing of native vegetation. Given the nature of native vegetation clearing the main focus of your application should be the consideration of threatened plant species.

The following plant list was prepared by the Northern Territory Government and is regularly reviewed. The complete list of NT Threatened Plants and Animals can be viewed at <http://www.nt.gov.au/ipe/pwcnt/>
