

Ant Trapping Manual

The Ant Collecting Kit includes:

- This 'Ant Trapping Manual'
- 1 'Invasive Ants' brochure
- 1 pink plastic bag
- 1 sheet asking for Name, Date and Location
- 5 collection jars
- 1 jar containing vinegar
- 1 tin of tuna
- 1 portion of honey
- 2 wooden stirrers
- 1 reply postage paid envelope

How to prepare the collection jars:

Place a small amount of honey and tuna into each jar using the wooden stirrer provided.

How to set the traps:

Place the traps around your back yard or other suitable area where you would like to trap. Make sure the jars are lying flat on the ground some distance apart. Leave the lid near the jar and make sure you remember where you placed them.

How to collect the ants:

Leave the jars for several hours. Then collect all the jars, whether they contain ants or not. Pick up the jars, fill in some vinegar and screw on the lids. Swirl them around gently so that all ants are covered by vinegar. Place the jars containing the ants and the empty vinegar jar in the pink plastic bag.

IMPORTANT! Fill out the sheet that requests your name, date and location and place it inside the plastic bag!

Place the plastic bag containing all the jars into the envelope and send it via regular post (the return address and postage have been applied to the envelope already).
