## Average Weekly Full-Time Earnings

	NT	Australia
Change in the quarter (%)	↓ 0.3	↑ 1.0
Annual change (%)	↑ 3.0	↑ 5.5

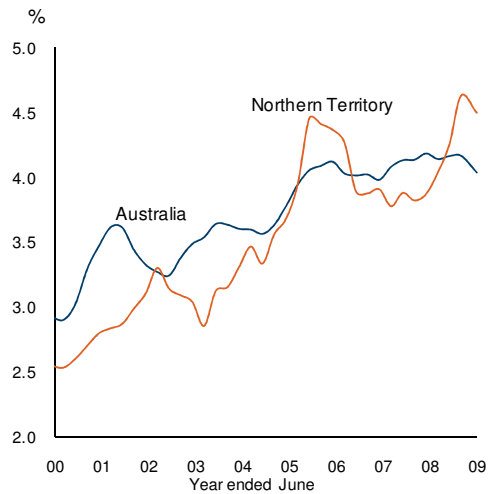

Average weekly full time adult earnings (AWFTE) data should be viewed with caution. The measure is influenced by compositional changes in the survey sample. In addition the small sample size in the Territory results in substantial volatility and high standard errors.

In the May quarter 2009, seasonally adjusted Territory AWFTE decreased by 0.3% to \$1173.10, compared to the national increase of 1.0% to \$1242.70. AWFTE in the Territory was the third lowest of the jurisdictions in the May quarter 2009 (see Chart 2).

In annual terms, seasonally adjusted AWFTE (which includes overtime and bonus payments) increased by 3.0% in the Territory and 5.5% nationally.

In year on year terms, Territory AWFTE increased by 4.1% while increasing by 5.1% nationally (see Chart 3).
