## **APPROVAL OF ELECTRICITY NETWORK TARIFFS FOR 1 OCTOBER 2000 TO 30 JUNE 2001**

In accordance with clause 78(3) of the *Electricity Networks (Third Party Access) Code* ("the Code"), the Commission hereby approves the attached schedules of network tariffs and charges relating to the use of the Power and Water Authority's electricity networks. In the Commission's opinion, these tariffs and charges comply with the relevant principles laid down in the Code.

The approved tariffs and charges are the maximum that the Authority can charge for standard network access services provided with respect to each electricity network.

The approved tariffs and charges may take effect 30 days after they are published by the Authority.

The Commission approves the combining of the revenue caps determined previously by the Commission for the Authority's Darwin and Katherine networks, for the purpose of establishing tariffs and charges for the use of the Northern Grid (that is, the inter-connected Darwin and Katherine distribution networks).

The tariffs and charges approved for the Northern Grid incorporate an amount, in addition to the determined revenue caps, which the Commission has approved for the purpose of recovering the costs which the Authority pays to the operator of the transmission line connecting the Authority's Darwin and Katherine distribution networks.

The rationale for these decisions, as required by clause 64 of the Code, will be set out in a paper to be entitled "Network Tariffs and Charges, 2000-01" to be issued by the Commission shortly.
