

School Bus Survey

The NT Government will be conducting a survey of school bus requirements in greater Darwin area schools next week.

The results will enable the planning of improved bus services for the 2008 school year.

During the week commencing on 27 August, students who are already using the school bus service, or may in the future, will be asked to participate in a short survey which will be conducted by their teachers at school.

The Department of Employment, Education and Training will ensure that no students are identified by name and that all information obtained during the surveys will be treated with the strictest confidence and that all forms will be destroyed at the completion of the planning process.
